CALIBER PMT 700D - DAB + FM TRANSMITTER

Plug and play
Universal for any car radio
With FM tuner and/or AUX in

PURE – HIGHWAY

Easy to fit in-car digital radio that also enables you to listen to your iPod/MP3 player
Powered from in-car power socket, easily attached to your windscreen with a removable flexible mount
Requires no expertise to install
Can be removed from the car to be used as a personal DAB radio (requires batteries and headphones, not

included)

DABmotion – DIGITAL RADIO (see attachment for more information)

The DABmotion can be installed in two different ways:

1. Hard wired fitting. This means that the transmitter and all cables will be installed behind the dashboard, no cables will be visible (except for that of the antennae which will be discreetly stuck along the side of the windscreen. The power for the device will be supplied from behind the dashboard, not directly from the cigarette lighter. **Fitted by our technicians for CHF 240.**
2. Soft fitting. Using the cigarette lighter as a power supply. This means the transmitter will be placed either in the glove box or stuck to the plastic under the dashboard. The power from the cigarette lighter will be used, a cable will run from here to the transmitter placed in the glove box, and then a cable (the antennae) will run from the transmitter to the windscreen. Cables will be neatly tucked where possible. **We charge CHF50 for this soft fitting.**

Media DAB PASER digital radio (see attachment for more information)

Allows you to transform your OEM FM radio into a real digital receiver
All functions are manageable from your car steering wheel commands
Device needs to be professionally installed by our technician
